Languages: JavaScript, TypeScript, Java, C#

Frontend: React, Next.js, HTML, CSS

Backend: Node.js, Express.js, NestJS, REST APIs

Additional Backend: Spring Boot, ASP.NET Core

Databases: MongoDB, PostgreSQL, MySQL

Architecture & Systems: Microservices, WebSockets, Multi-Tenant Systems, Authentication, RBAC

DevOps & Tools: Docker, Git, GitHub, GitHub Actions, Azure DevOps, CI/CD, Postman, Swagger/OpenAPI

Development Practices: Agile/Scrum, SDLC, Code Review, API Development

PROFESSIONAL EXPERIENCE

JAF Digital Inc - Makati City, Philippines

Lead Full Stack Developer | *Feb 2026 – May 2026*

Multi-Tenant SaaS Live Chat Platform

• Selected to lead the architecture and end-to-end development of the company's second flagship multi-tenant Live Chat SaaS platform, driving technical direction from design through production.
• Led a cross-functional team of 3 developers and QA, overseeing sprint planning, code reviews, technical decisions, and feature delivery.
• Designed and implemented platform architecture, authentication, REST APIs, and real-time communication using React, TypeScript, Node.js, Express, and WebSockets.
• Built responsive client and administrative applications while integrating real-time services and backend APIs.

Bluewood - Las Vegas

Full Stack Developer | *May 2023 – Dec 2025*

E-Commerce Platform — Shopify | *Jan 2025 – Dec 2025*

• Developed Node.js/Express backend services and reusable React/Shopify components supporting product, customer, inventory, and business workflows.
• Built operational dashboards and platform enhancements to support business operations and administrative processes.
• Collaborated with stakeholders and cross-functional teams to deliver production features in an Agile environment.

Real Estate Marketplace Platform | *Jan 2024 – Dec 2024*

• Engineered backend services supporting property listings, customer management, and business workflows.
• Developed responsive React dashboards with real-time analytics for administrators and clients.
• Contributed to architectural planning, code reviews, API development, and continuous platform improvements.

Fintech Platform | *May 2023 – Jan 2024*

• Developed full-stack features supporting commission processing, hierarchical downline management, transaction workflows, and business reporting.
• Built dashboards and backend services for transaction monitoring and operational analytics.
• Delivered production features through Agile sprints using Azure DevOps.

SELECTED PROJECT

Patient Referral Network Platform – New York

Full Stack Developer

• Designed and developed a healthcare referral platform with HIPAA-aligned security practices, secure referral workflows, real-time messaging, audit logging, and role-based access control.
• Built production-ready backend services and responsive web applications to streamline communication and referral workflows between healthcare providers.

EDUCATION

STI College Dasmariñas, Philippines | 2026

Bachelor of Science in Information Technology
