SUMMARY

Full Stack Software Engineer with 3+ years of experience designing, architecting, and delivering scalable web applications across SaaS, fintech, healthcare, e-commerce, and real estate. Proven experience leading cross-functional teams, driving end-to-end product development, and building production-ready systems using the MERN stack, TypeScript, Java, and Spring Boot. Passionate about solving complex business problems through scalable architecture, modern backend services, and intuitive user experiences.

WORK EXPERIENCE

Lead Full Stack Developer — Multi-Tenant SaaS Live Chat Platform *Feb 2026 – May 2026*

JAF Digital Inc, Makati City, Philippines

- Selected to lead the architecture and end-to-end development of the company's **second flagship multi-tenant Live Chat SaaS platform**, driving technical direction from design through production.
- Led a cross-functional team of **3 developers and QA**, overseeing sprint planning, code reviews, technical decisions, and feature delivery.
- Designed platform architecture, authentication, REST APIs, and real-time communication services while building responsive client and admin applications.

Full Stack Developer — E-Commerce Platform (Shopify) *Jan 2025 – Dec 2025*

Bluewood, Las Vegas

- Developed backend services and reusable storefront components that streamlined Shopify business operations and improved developer productivity
- Built operational dashboards and platform enhancements supporting inventory, customer, and business workflows.
- Collaborated with stakeholders to deliver production-ready features in an Agile environment.

Full Stack Developer — Real Estate Platform *Jan 2024 – Dec 2024*

Bluewood, Las Vegas

- Engineered backend services supporting property listings, customer management, and business workflows.
- Developed responsive React dashboards with real-time analytics for administrators and clients.
- Contributed to architectural planning, code reviews, and continuous platform optimization.

Full Stack Developer — Fintech Platform *May 2023 – Jan 2024*

Bluewood, Las Vegas

- Built secure financial applications supporting commission processing, downline management, and business reporting.
- Developed dashboards for transaction monitoring and operational analytics.
- Delivered production-ready features through Agile sprints using Azure DevOps.

Featured Consulting Projects

Patient Referral Network Platform (New York) | *Full Stack Developer*

- Designed and developed a **HIPAA-aware** healthcare referral platform featuring secure referral workflows, real-time messaging, audit logging, and role-based access control.
- Built production-ready backend services and responsive web applications to streamline communication between healthcare providers.
